Version 4, April 26, 2023

Background:

Rosebel Gold Mines-RGM is committed to safety as a key company value which is ZERO HARM. Contractors directly affect RGM safety performance in promoting and maintaining a safe and healthful workplace. Contractors are an integral part of RGM business and therefore we expect contractors to provide the same commitment to health and safety.

Purpose:

The purpose of Contractor Safety Management is to set policies/procedures and expectations for contractors performing work at Rosebel Gold Mines; and establish roles and responsibilities for contractor personnel throughout the RGM/Contractor relationship.

Scope:

The Safe Work Plan form applies to all contract works > 1 year which will be done on behalf of Rosebel Gold Mines. For work/job <1 year there is the contractor work/job scope form that should be filled in prior to starting with the work/job. This will be provided to the contractor after the job is awarded.

2. Health & Safety Policy

Please state **Contractor Company** Health & Safety policy or Health & Safety commitment below:

• Contractor Company Health & Safety policy:

Health, Safety and Sustainability Policy

Rosebel Gold Mines N.V. (RGM) operates a large-scale open pit gold mine located in the tropical rainforest of Suriname.

RGM's management, employees, contractors, and stakeholders are committed to implementing Zijin Mining's vision by striving to achieve "zero work fatality and zero occupational diseases" and maintain a high degree of harmony and unity among the environment, the society, and attainment of economic values.

This commitment will be integrated into all activities related to and undertaken by our operation.

We will operate in accordance with our commitment and:

- Comply with applicable regulatory requirements on Occupational Health & Safety and Environmental protection-related laws, regulations, and standards to maintain a compliant operation.
- Set targets for ecological environment conservation, health, and safety performance to
 ensure continuous improvement in our operations.
- Conduct our business with high importance to conserve biodiversity and ecological systems, use sustainable resources, avoid pollution, and improve waste management;
- Minimize the exposure of employees, contractors, and visitors to health and safety risks by identifying and assessing hazards and formulating and implementing effective responses to emergencies and crises.
- Transparent communication and engagement with internal and external stakeholders in respect of the Company's policies on health, safety, and Environmental management and its performance, and openly disclose it to the public throughout the life cycle of our operations.
- Engage in frequent dialogue and collaborative work on environmental concerns with local and international industrial organizations, institutions of higher learning, and other external stakeholders to support the company's sustainable development.
- To establish effective communication and negotiation mechanisms with the Company's
 internal and external stakeholders regarding Health, Safety, and Environmental issues.
- Provide regular training on all significant risk controls, ecological and environmental
 protection for all employees, and effective communication to ensure that our employees
 and contractors can fulfill their Health & Safety responsibilities.
- All employees and contractors shall be responsible for their own safety and the safety of
 those around them and shall participate in activities that can reduce operational risks.
 They shall have the right to intervene whenever the work conditions are unsafe.

RGM HSS policy

3. Responsibilities

List persons with the different responsibilities that are assigned on job/project:

•

11. Induction & Training Requirements

Inductions for contractors are to be completed in accordance with RGM Induction process.

List training requirements that are applicable for work/project:

Description	✓	Description	✓
Drilling & Blasting		Hazard Identification and Awareness	
Back Injury Prevention		Hazmat Training	
Basic New Employee Orientation		HAZWOPER Training	
Basic Principles of Safety		Hearing Conservation	
Behaviour Based Safety		Heat Stress Prevention	
Chemical Awareness		Pressure taps	
Crane safety		Hot Taps	
Body Positioning Training		Hot Work	
Defensive Diving		Incident Investigation and Reporting	
Confined Space Entry		Industrial Hygiene Exposure Monitoring	
Hoisting and rigging		Job Hazard Analysis	
Fatigue management		Line Breaking/Opening Process	
Lock-Out/Tag-Out Verification		Near Miss Reporting	
Electrical Safety		Personal Protective Equipment	
Emergency Evacuation		Power Actuated Tools	
Emergency Response Plan		Radiation Control	
Excavation and Trenching		Respiratory Protection Program	
Mobile equipment		Safety Observation/Audit	
Safety Equipment Usage		Scaffolding Safety	
Fall Protection		Signs and Barricades	
Ladder safety		Start-up Safety Workshop	
Fire Safety		Water Survival	
Fire Watch		Welding/Cutting	
First Aid		Other	
Flammable and Toxic Material Handling		Other	
Hazard Communication (MSDS), Labelling, etc.		Other
